

Retraction

Circulating miR-134 is a potential biomarker for diagnosis and monitoring of major depressive disorder [Retraction]

Chen XY, Liu XL, Zuo XZ, Cheng C, Huang W, Xie P. *International Journal of Clinical and Experimental Pathology*. 2020;13:2082-2091.

Several institutions participated in this study, but the contributions of some research participants were not reflected by this paper. Considering that our research is still ongoing, the publication of this article harmed their inter-

ests. They disapproved of the publication of this paper. After much discussion, we chose to perform further studies to add additional data, and thereby complete the project. At that time, we will be able to present our results better and reflect the contribution of each participant. For these reasons, we decided to retract the manuscript.
